CERTIFICATIONS

Salesforce Certified Force.com Developer (DEV401) for Cloud applications

WORK EXPERIENCE(2 YEARS AS SOFTWARE DEVELOPER)

Salesforce Developer
September 2012 - November 2014
Dreamwares, India

- Developed Apex code, Visualforce & Trigger code for developing native Force.com Applications and managed projects.

- Responsible for interacting with the client and understanding the business requirements

- Requirement Analysis, Time estimates preparation and Documentation.

- Worked on Configuration, Customization, Development on Force.com platform as well as Data Integration and migration Tools such as Data Loader, Excel connector, Jitterbit, Translation workbench, etc.

TECHNICAL SKILLS

Programming and Scripting Languages	Apex, Force.com, Visualforce, C, C++, Java, html, VB.Net, CSS, JavaScript, JQuery (Basic) , C#.Net , ASP.Net.
Databases	SQL Server 2008, MS Access, SQL, SOQL
Data Integration and migration Tools	Excel Connector, Data Loader, JitterBit Connector, Translation workbench.
IDE	Force.com IDE
Operating System	Linux, Windows OS

PROJECTS

- **Data Migration**

Migrated data of salesforce reports in another salesforce org. Used Excel connector. Also updated standard fields like CreatedDate, ModifiedDate, Owner.

- **Salesforce Standard Chatter Customization**

Developed the chatter functionality. Created the Custom user profile Page, Group Profile page, and worked on functionalities like Add and Remove group Members, Change Member roles, Change user contact information, Change Group Setting.

- **Developed Registration API for Salesforce-to-backend database server communication.**

Developed API to communicate with the Onelead server to transfer the Salesforce account information needed to run the background interface. Worked on **webservice callouts**, **JSON parsing** and encryption logic. Developed managed package and Installation guide.

- **XML Integration**

Developed a solution for an XML integration to send Product Orders to Distributor and receive Shipping

Confirmation from Distributor. Developed the **webservice** to receive the Shipping confirmation information in XML format and updated the appropriate data in salesforce

- **Product Order and Customer Order Generation**

Worked on building Product Order form and a pdf which shows details of all the products added in the Order form and the agreement documents related to these products. Used **regular expressions** for validation, **trigger** to generate Product Order and Customer Order once the pdf was approved by the customer.

- **Partner Portal Case Owner Change Task**

Worked on changing the owner of any new case for partner portal user for specific condition. Created a list button to update the status of all Cases to 'Delivered'. Triggered a notification email to creator on any status change.

- **Webservice callout Triggers.**

Developed trigger which calls four webservices from batch apex and parses the JSON response and updates Object fields accordingly depending on different conditions. Used scheduler for batch apex

- **MS Visio Flow XML Parsing**

Translated visio file with a Flow (with links to process, procedure and work instructions) into correct language version based on the user language settings in Salesforce. Worked on XML Parsing of visio file and converted visio into html version with correct language version.

EXTRA CURRICUAR ACTIVITIES

- The Art of Living (Yoga, Health and Happiness) Instructor for a non-profit NGO. Leading org initiatives in Kansas City.

GRADUATE PROJECTS

1. **Accounting Cloud** : Developed project in **Salesforce** to handle Accounting details of the Dreamwares Company. Generated financial reports like profit & Loss Statement, Journal, Balance sheet, General Ledger, etc.
2. **Library Management System** in .Net
3. **Medical Mangement System** in Java
